WORK EXPERIENCE

BLACKBIRD INTERACTIVE

Vancouver

2023 Jan - Present

UI | UX Designer

- Launched AAA Game (RTS) Minecraft Legend.

- Generate and help lead ideation solutions for complex design problems.

- Created and refined prototype of various fidelities (rapid, mid-fidelity, high fidelity) to communicate intent and evaluate effectiveness.

- Partner closely with developers to implement high-quality, well-crafted, design-led initiatives.

- Actively contributed to the codebase using the Bedrock/React library, which encompassed tasks such as prototyping, implementing, refining CSS styles, adding interactive game elements, and using version control (Git, GitHub) for effective collaboration with engineers.

NAVIGATOR GAMES LTD.

Vancouver

2018 May - 2022 Dec.

UI | UX Designer

- Launched RPG Mobile game called Avatar The Last Airbender.

- Provide direction and input into user experience design and interactions for mobile platforms.

- Create concepts for wireframes, prototypes, UI mock-ups, and information architecture with a clear focus on the development, QA, and Marketing teams.

- Take complex information and turn it into user-friendly UI design solutions.

- Work closely with the engineers to implement the UI in Unity.

Senior Web Designer

- Create a website by using HTML, Javascript, CSS, PHP, etc.

- Design research, ideation, and creation of marketing and branding assets. Pitch & innovate creative ideas or new initiatives to Ecommerce Analysts to enhance design or projects.

- Check Google Analytics weekly to monitor user engagement, perform maintenance, and make product improvements
